

## DESCRIPTION OF SEEDLINGS AVAILABLE

YR = AGE OF SEEDLING, THEN IT'S EXPECTED HEIGHT FROM OUR DISTRIBUTORS

### EVERGREENS

- Canaan Fir - **NEW FOR 2009** - 3 yr. 6"-12" Soft, short needles, withstands warm temperatures. Good choice for Christmas trees.
- Colorado Blue Spruce - 3 yr. 10"-16" Has blue-green color. Can grow to 50-75 feet. Popular Christmas tree. Grows to 6 feet in 10-12 years.
- White Pine - **Native species**, 3 yr. 12"-18" Has soft, long needles, grows rapidly in a variety of soils and prefers sun. Grows to 6 feet in 8-11 years.
- Douglas Fir - 3 yr. 14"-20" Grows best in moist, well-drained soils. Does not do well in heavy, wet, clay soils. Popular Christmas tree. Grows to 6 feet in 9-10 years.
- Eastern Red Cedar - **Native species**, 3 yr. 10" - 20" Dense pyramidal evergreen growing to 40 to 50 ft. Spread 8 - 20 ft. Medium green needles are flat and scale-like. Does well in poor gravelly soils. Used for evergreen screen or hedge.

### DECIDUOUS TREES & SHRUBS

- Buttonbush - **NEW FOR 2009 Native species**, 3 yr. 10"-20" Grows to 30 feet. A shrub or small tree that gets its name from its fragrant ball like clusters of white flowers which bloom May-August. A good source of nectar for butterflies. Does well in swampy conditions.
- Gray Dogwood - **Native species**, 2 yr. 10"-24" Grows to 15 feet. Dense foliage turns purple in the fall, numerous small white flower clusters, bloom in mid June, giving way to small white berries. Grows well in average soil. Very good for erosion prone areas. Wet tolerant.
- Winterberry Holly - **Native species**, 2 yr. 10"-24" Mature height and spread of 6 to 12 feet. Female plants produce bright red berries which can last all winter long. Likes acidic soils, will tolerate wet, swampy conditions.
- American Cranberry Bush Viburnum - **Native species**, 2 yr. 10"-20" Deciduous shrub, growing 8-12 feet with a spread to 4 feet. Has clusters of white flowers in May. Has scarlet berries from mid-summer through winter that provide food for birds. People make jelly from the berries. A good screening, background plant, spaced four feet apart. Full or half day sun.
- White Oak - **Native species**, 3 yr. 5"-12" Excellent for wildlife food, shade and firewood. Dense foliage is bluish-green, to reddish-brown in fall. They have a high resistance to ice breakage and oak wilt. Also good tolerance to highway salt. Can grow 80-100 feet tall.
- Paper Birch - **NEW FOR 2009 native species**, 3 yr 20"-40" Medium-sized deciduous tree reaching 45 ft tall. Adapts to most soil conditions, but does best in well drained, moist acidic soils. The bark is white and autumn leaf color clear yellow. Wildlife and butterflies consider the leaves and bark an important dietary component.
- Yellow Delicious Semi-Dwarf Apple - 2 yr. 3'-4' Medium large uniformly conical in shape. Yellow color with firm crisp juicy white flesh. Excellent for eating, baking sauce. Bears young and requires thinning. Excellent pollinator.
- Royal Gala Semi-Dwarf Apple - 2 yr. 3'-4' Medium sized apple with sweet firm flesh. The Royal Gala's skin is yellow-orange with red streaks. Delicious fresh, in a dessert or makes an excellent applesauce.
- Bluecrop Blueberry & Patriot Blueberry - **NEW FOR 2009** One of each variety. 2-3 yr plants 12-18 inches Both varieties offered are proven producers of large, high-quality fruit from early to late July and packed full of rich flavor. Plants are disease and root rot resistant and tolerate a variety of soil conditions. Blueberries belong in every home garden! Not only do they produce deliciously sweet and healthful fruits, the 4- to 6 foot shrubs also make handsome landscape plants. Once established, blueberries need little care or attention.
- Navajo Blackberry - **NEW FOR 2009** Three plants per packet. 2 yr plants, 14"-18" Popular thornless variety and can produce a large crop of sweet blackberries great in pies, jams or fresh picked. Unpicked berries are a favorite for songbirds and woodland critters. Tolerates both heat and cold, but will produce best harvests when planted in full sun.

### GROUND COVER & DEER REPELLENT

- Pachysandra Terminals - 2 yr Evergreen ground cover. Perfect for dense shade. Grows 6" to 12", spreading indefinitely. Plantings should be spaced 6" to 10" apart. Hardy.
- Deer Repellent - A ready to use 32 oz. sprayer bottle of a unique blend of organic ingredients proven to repel deer, rabbits and other foraging wildlife without harming them. A single application lasts from 60 to 90 days and allows new and or damaged growth to regain vigor and beauty naturally.

Planting survival rates of bare-root seedlings vary from site to site, from excellent to poor. We strive to provide the most viable seedlings. All efforts are made to prevent root stress. **The conservation district will NOT ensure successful planting of bare-root seedlings, just as our suppliers will not ensure seedling survival.** The district is not responsible for mistakes made by the suppliers of our seedling stock.
