Focus: Watersheds of Pennsylvania

- Know the major watersheds of Pennsylvania.
- Explain the water cycle and how water enters and moves through a watershed.
- What are some of PA's sources of water pollution?
- Learn about the lizards and skink that live in Pennsylvania and a few of our threatened and endangered species.
- Be able to identify the reptiles and amphibians listed under #1, by live sample or photo, and know their general characteristics, range, and habitat.

Sample Question: In addition to its location in south central Pennsylvania, which watershed can also be found in Virginia, West Virginia, and Maryland?

- A) Potomac B) Genesee C) Ohio D) Delaware

an environmental education partnership
